

Revolution 360® flushing technology

This innovative flushing technology sends 360 degrees of water through the bowl for complete coverage that leaves nothing behind.

CleanCoat™ technology

CleanCoat prevents bacteria, mildew and mineral deposits from sticking to the bowl, so your toilet stays cleaner longer.

ReadyLock™ installation system

The patented ReadyLock system doesn't require any holes to be drilled into the floor on most installations. It makes installation fast and easy.

SKU	Description	Tank SKU	Bowl SKU	Rough-In Options*	Water Usage	Bowl Shape
K-20450	Irvine Comfort Height Toilet	K-20205	K-20485	10", 12" or 14"	1.28 gpf 	Elongated
K-90097	Irvine Comfort Height Toilet With ContinuousClean Technology	K-90098	K-20485	10", 12" or 14"	1.28 gpf 	Elongated

Color Options:

*10" (K-5383-NA) and 14" (K5381-NA) rough-in kits are sold separately

WaterSense®-labeled toilets use at least 20% less water than standard 1.6-gallon toilets while still meeting strict flushing performance guidelines.

Irvine™ Comfort Height® Skirted Toilet

The contemporary skirted design of the Irvine toilet makes it the perfect complement to any bath or powder room. And it takes toilet cleanliness to the next level with Revolution 360® flushing technology and optional ContinuousClean technology. We never compromise when it comes to toilet cleanliness or design. Why should you?

ContinuousClean Technology

The ContinuousClean system gives you a truly self-cleaning toilet because there are no buttons to push. It automatically fights, grime, germs and stains with every flush to keep your bowl cleaner longer. In fact, KOHLER® toilets with the ContinuousClean system stay cleaner 5X longer than conventional toilets.*

*KOHLER toilet with ContinuousClean compared to KOHLER toilet without ContinuousClean. Based on consumer perception study and bacterial counts.

ContinuousClean sets up in three simple steps.

On select toilets, ContinuousClean is factory-installed and built into the tank. Setup is quick—just follow the three steps below. And once you set it up, you don't have to worry about it again until the light indicates you need new cleaning tablets.

Step 1: Insert two toilet bowl cleaning tablets

All you need are two puck-style toilet cleaning tablets of your choice, affordable and widely available in retail stores and online. Once you access the inside of the tank, open the blue reservoir and place the two cleaning tablets inside. Two cleaning tablets cost approximately \$6 and have a lifespan of approximately 1 year.

Step 2: Set the dial

Three settings let you decide how much cleaning power goes in to each flush.

Step 3: Look for the blue light

ContinuousClean comes with two AAA batteries, so there are no cords to worry about. The batteries power the LED indicator light that lets you know the system is working. After inserting the batteries and the tablets, look for a blue pulse (one second in duration) that indicates the system is working properly and cleaning solution is being delivered.
